Audible & Visual Driver Alerts

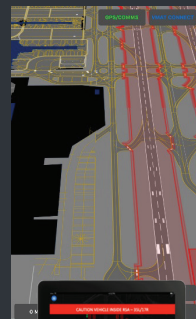

Supervisor Notifications

ID Vehicle Tags

The DASA system allows an airfield vehicle operator to maintain situational awareness on your AOA to avoid incursions during normal and irregular operations and in all weather

LOW IMPLEMENTATION & OPERATING COSTS

POWERED BY
INDMEX AVIATION

conditions. It **displays their own real-time position of their vehicle** on their iOS device over a highly accurate AOA map. This simple, intuitive and accurate representation of their own location on the airfield, **alerts the driver & supervisor** when the location of the vehicle is approaching and inside an airfield defined geo-fenced area, like a runway safety area, hold short line or other hazardous locations in and around the airfield.
